NOTES ON FORMAT

1. The population figures for public libraries in the statistical section of this report used to compute most per capita figures are from the 1982 population projection estimates provided by the Arizona Department of Economic Security, Population Statistics Unit, and approved by the six regional councils of government and the Population Technical Advisory Committee (POPTAC). Figures marked with an asterisk (*) are from the 1980 Census. Figures marked with a double asterisk (**) are estimates based on the 1980 Census as obtained from the Arizona Department of Economic Security and the associated governmental units mentioned above.

2. The population figures for academic libraries represent student populations derived from the Higher Education General Information Survey (HEGIS XVI) coordinated by the Arizona Commission for Postsecondary Education.

3. With the support of the Arizona Academic Librarians, a new section of academic library statistics has been added.

4. New data elements have been added to the statistics section. These include: (a) Titles Owned, 6/30/82; (b) Reference Questions Received; (c) Reference Questions Answered; (d) ILL Items Borrowed; and (e) ILL Items Lent. For the academic libraries, the ILL data elements are: (a) ILL Books Borrowed; (b) ILL Books Lent; (c) ILL Periodical Articles Borrowed; and (d) ILL Periodical Articles Lent.

5. The total hours reported in the statistical section are winter service hours. In some instances, summer hours will be different.

6. The per capita circulation, items, and funding figures for county libraries were calculated by subtracting the populations of those cities and towns with libraries from the total county population (communities with branch libraries were not subtracted).

7. Where applicable, the following abbreviations were used to indicate the type of facility.

   I Independent
   B Full Branch
   A Affiliate
   S Separate room in school
   SG Separate room on school grounds
   DC Deposit collection - no services
